

PRESS RELEASE – FOR IMMEDIATE RELEASE

TRADETECH CONSULTING BUILDS AND SUPPORTS SKANSKA'S GUARANTEE MANAGEMENT SYSTEM

Stockholm – October 12th, 2009 – TradeTech Consulting, leading provider of consulting services to the Nordic treasury, trading, insurance and capital markets space, have designed, built and implemented an application based on a business intelligence platform for Skanska Financial Services. The application enables Skanska to track guarantees issued worldwide.

“Having used the new guarantee management system since July, we are very pleased with it” says Håkan Smeds, Head of IT at Skanska Financial Services. “By using mainstream components, such as a database and BI components from Microsoft, we ensure the availability of local support, reduce costs and realize operational efficiencies. We awarded the system management and support contract to TradeTech Consulting partly because they built it, but also because they are a stable and experienced partner that already supports our Wallstreet Suite installation.”

“We are pleased to extend the range of services we provide to Skanska, in addition to supporting their Wallstreet Suite installation. We are proud that Skanska have entrusted us to design, build, implement and now also support their guarantee management system,” says Joakim Wiener, CEO of TradeTech Consulting.

“A key advantage of the solution is that it provides a very flexible business reporting platform for the client,” says Graeme Newcomb, BI expert at TradeTech Consulting. “In addition, the robust database design ensures that the business data underlying the reports is of significantly better quality.”
